Essex comprehensive school implements new “bog standard”

The new girls toilets at Thurstable School.

An Essex comprehensive school has installed stylish new state-of-the-art handwasher /driers and toilets for more than 1,150 students.

Pupils at Thurstable School will be sitting pretty, thanks to new sanitary ware supplied by Wallgate, the UK's leading provider of high impact vandal resistant toilets.

The new handwasher/drier units and toilets were installed for boys and girls following pupil unhappiness with old-style toilets – a known hotspot for bullies and vandalism.

The work included the complete re-design of an existing toilet block, installation of new cubicles and tiling, new electrical lighting and wholesale replacement of old, breakable ceramic toilets and washbasins with brand new state-of-the-art high impact resin sanitary ware.

The contract included:

- 4 Wallgate CME_45 hand washer driers in the girls toilets;
- 9 Wallgate CWC80st toilets (with fixed toilet seats) in the girls toilets
- 3 Wallgate CME_45 hand washer driers in the boys toilets, and;
- 7 Wallgate CWC80st toilets in the boys block.

The work also included installation of a Wallgate Cist05 and cidv05 to control waterflows.

Fact Box

Thurstable School, Tiptree

Wallgate's Sales & Service Manager, Phil Thorne (left), with Malcolm Over, Site Manager (right) at Thurstable School.

Thurstable School, Sports College and Sixth Form Centre is an over-subscribed mixed gender comprehensive school near the village of Tiptree.

The school was founded as a secondary school fifty years ago. Each curriculum area has its own suite of rooms. There are excellent specialist teaching facilities, with all round access to new technologies.

Thurstable School is situated on an attractive greenfield site on the edge of the village and enjoys extensive school grounds. It currently has just over 1,150 pupils aged eleven to 18.

The school is recognised as a “high performing school” and the most recent Ofsted report (March 2008) described Thurstable School as “good and improving,” with outstanding features of leadership and management.

What makes the Wallgate handwasher/drier a classic choice?

The handwasher/drier saves space and is more hygienic

These self contained and fully recessed hand hygiene facilities are popular with schools, colleges and a wide range of local government applications.

The simple, uncluttered design means it is a popular toilet option in many of the UK's local authority public toilets, transportation facilities, pubs, clubs and restaurants, leisure complexes, clean rooms and food preparation areas.

Advantages of the Wallgate range of handwasher/drier include:

- anti-vandal design;
- designed for disabled persons;
- modular low-cost installation;
- low running costs energy and water;
- 4 litre soap capacity;
- matching urinal, WC pan and shower available.

Soap is dispensed from a 4 litre container, while pupils benefit from the hygienic benefits of internally heated warm water and high-powered hot air drying.

Wallgate handwasher/driers units were chosen because they unclutter toilet blocks and replace soap dispensers, sinks, splashback tiling, water heaters, pipes and control valve - and all of the associated expensive on-site labour and maintenance costs - with one hole in the wall unit. Long-term cost savings are significant.

Wallgate ...takes some beating!

When it comes to high quality, long-lasting, damage-resistant sanitary ware for the education sector, Wallgate takes some beating.

For the past 30 years Wallgate has been the UK's leading designer and manufacturer of vandal-proof sanitary ware for a wide range of applications.

Having started as electrical engineers, Wallgate patented the handwasher/drier (see picture on left) – a high impact all-in-one washing facility which proved popular with local authorities.

Over time Wallgate's products have expanded to include high impact resin sanitary ware, which has proved highly durable even in remote areas with extreme vandalism.

Wallgate toilet and washroom equipment is now used in schools, colleges, public conveniences, public buildings, leisure centres, supermarkets and fast-food outlets the length and breadth of the UK.

One of the Wallgate cwc80st toilets at Thurstable School.

We support the "Bog Standard" campaign and work alongside schools, students, teachers, governors, local education authorities and the department for education and children to improve school toilets.
