WG2020-2-C19 – Coronavirus Pandemic

Note: this risk assessment follows the format set out in the UK Government document: Working safely during Covid-19 in or from a vehicle and includes additional measures following gov.uk guidance created as part of National Lockdowns. Working safely version published 30.03.2021; National Lockdown guidance version 28.01.2021

Likelihood (L)		Severity (S)	
1	Almost impossible	1	Low -Causing a minor injury. Cuts or bruising
2	Improbable/ not very likely to happen	2	Medium – Absence from work for less than 3 days/strain and sprain
3	Possible/could happen	3	Major – Absence from work for more than 3 days/ fractures, burns etc
4	Very likely/would not be surprised	4	High – Long term absence from work/slipped disc
5	Inevitable/certain to happen	5	Fatality
Total Score		Risk Category	
1-5 (Low)		Considered tolerable risk, normal day to day activity	
6-10 (Mid)		Risk is to be controlled as far as is reasonably practicable by completion of risk assessment & method statement	
11-20 (High)		Hazard must be avoided or the level of risk reduced significantly by control measures & safe systems of work	
21-25 (V.High)		Advice should be obtained from the Supervisor/.Manager/Safety Services before proceeding with the task.
